The moly test as run by Blake in the Atlas Lab was conclusive in that the known sample ran in the order of 50,000 ppm Mo (estimate) and the Risby sample ran 40 ppm. I will send in a sample to have it assayed for nickle.

I am sorry that I did not make it down the road tonight, but I forgot that I had made arrangements to hold court for some people who are driving down from Anvil, I will not let that happen again. If you have some urgent ~~messages other than to tell me it is raining, come into Ross River.~~

Mabel is back and in good health. It is necessary weather permitting, that Pete do his helicopter recce as soon as possible as Rolls and Moon are going to stake in the Pony Creek area. Spartan also sound as if they are going to put Roberts in there as well.
