YUKENO MINES LTD
GEOLOGICAL SKETCH FORMO DRIFT

Scale 1" = 20'

Mar. 16 J.R.C.

Vein consists of roughly 10 inches of steel galena in 30 inches of gouge. Dips roughly 35°. Appears to assay 60 ounces silver & 55% lead in steel galena. Gouge carries silver values

This vein mainly sphalerite with silver values. Assumed to join 27-2 ahead.

Vein consists of 10 inch massive galena containing ruby silver and some sphalerite. Assays very high. Green represents carbonate zone carrying approx 85 ounces silver dip about 45-50°

Country rock schist 27-4-2 drift walls good 27-2 drift walls softer

Assays { 27 galena
 6.7 lead
 3.9 zinc }
 33

30" qz carb. s. dentite (includes 4" pyrite & 16" steel galena)

Vein material, gouge etc. Contains assay values varying from 20 ozs to 85 ounces

Steel galena assays 80 ozs silver 55% lead

Massive galena with Ruby Silver assays in hundreds of ounces silver and 76% lead.
