Dear Bill:

I have been asked by our Vice-President of Exploration, Glen Simpson, to forward a copy of a recent barite find near the Anvil Mine. Our Company has limited experience in the industrial minerals field, and would appreciate any comments you might have on possible interests by your Company on such a find.

In glancing through the report, which is included, it appears the sampling and assaying are a bit sketchy and limited at this point, however, I believe you will be able to get a general idea of the quality and extent. The location of the deposit is very convenient to the mine, being just on the other side of the valley.

If you have any interest in becoming directly involved in the project, please let us know, or if you have any suggestions as to what steps we might take to continue development, we would appreciate any information you could give. We would appreciate return of the enclosed copy if you are not interested.

Sincerely,

J. C. Devitt  
Mine Superintendent
