Magnetic survey, July to October 1965 by Aero. Photo, Inc.
No correction has been made for regional variation

The magnetic data on this map were compiled and recorded along the flight lines shown. The anomalies and magnetic contours are dependent on the variations in the underlying rocks, and may be due to conditions near depths below the surface. High magnetic anomalies in the presence of basic rocks, such as diabase, gabbro, or syenite, may have a relatively high iron content, but in special instances
