

MAP 4380 G

# TENAS CREEK YUKON TERRITORY

Scale: One Inch to One Mile = 1

ISOMAGNETIC LINES (absolute total field)

- 500 gammas
- 100 gammas
- 20 gammas
- 10 gammas
- Magnetic depression

Magnetic survey, March 1968 to June 1968 by Aero Photo Inc.

No correction has been made for regional variation.

The planimetry for this map was obtained from topographical maps sheets published by the

016717

105-K-1  
Geochem

The magnetic data on this map were compiled from recorded along the flight lines shown. The anomalies expressed magnetic contours are dependent on the variable magnetism of the underlying rocks, and may be due to conditions near, or depths below the surface. High magnetic anomalies may be the presence of basic rocks, such as diabase, gabbro, or they may have a relatively high iron content, but in special instances or partly due to concentrations of magnetic ore minerals.
