Logan Mines - Roy Claims

Don Taylor - Turnex -
Jupiter property

Site 1

01014 #2

80 - 93

104 - 125

} ^{min}
zones

top zone crackle box with
calcite and a few %
po and aspy.

bottom zone is box and
structural zone with maybe
5-10% po spheral gal
would guess no more than
2% Zn overall.

skarn is the zone variably
calc below

Rabbitkettle above.

DD14 #1

100' - 105' Min zone

Rabbit above
below Sekiri

most of basal gray box
zone with vents

strongly of sph

po - minor gal

with a few inks

Foot of basal massive
spherical 'po.

DD14 #4

120 - 134

Foot basal sph gal po

rest of zone in 3M.

Sekiri below

Rabbit above

DDH 3

137-161

as above forest bound
Sph = pos = good -
2-4 & 2 in overall.

Site 2

DDH -7

94 - 100

Forest bound with
rare massive pods of Euc
Rabbit = good "acres"
skew below.

est H = 12!

DDH #5

63-77'

same story

DDH # 6

74-91'

rabbit above

typical
purplish brown "Sakui" below

same lobeby crust
covered mineral 2 10
massive pods
