Subject Plotting and Drafting of Vangorda Drill Holes

Enclosed is a sketch of rotary and diamond drill holes, on the Vangorda deposit, which require plotting and drafting into sections from 14E to 28E at a scale of 1:500, looking to the northwest.

I would also like a long section along the baseline through 81-VR-3 to 81-VR-29 with a view to the northeast. So the drill holes for this will have to be plotted and drafted with this orientation in mind.

Thanks,

Encl.
