Dear Jim:

As per our conversation this morning, I am enclosing a copy of a claim map which shows the approximate areas on your ground which we plan to do some soils drilling this month. This involves three sites, each end of Shrimp Lake and in upper Vangorda Creek, and about six holes per site. These holes are designed to go to bedrock or sufficiently deep to establish a good dam design. Access is readily available to the Shrimp Lake sites with only about 1,500 feet of road required at the Blind Creek end, but we have to put in a cat track to the upper Vangorda Creek site. This would take off from near Doal Lake by our present camp and follow the contours around to Vangorda Creek.

I believe there are two drill holes, presumably Cyprus Anvil's, near the Vangorda Creek end of Shrimp Lake which are on or near a proposed dam site. We would appreciate it greatly if we could study the logs from these holes. As you indicated, once we have the correct designation of these holes, either Bill Sirola or myself will contact Glenn for a copy of the logs.

Based on our discussion, I plan to proceed with this work. Thank you for your co-operation.

Best regards.

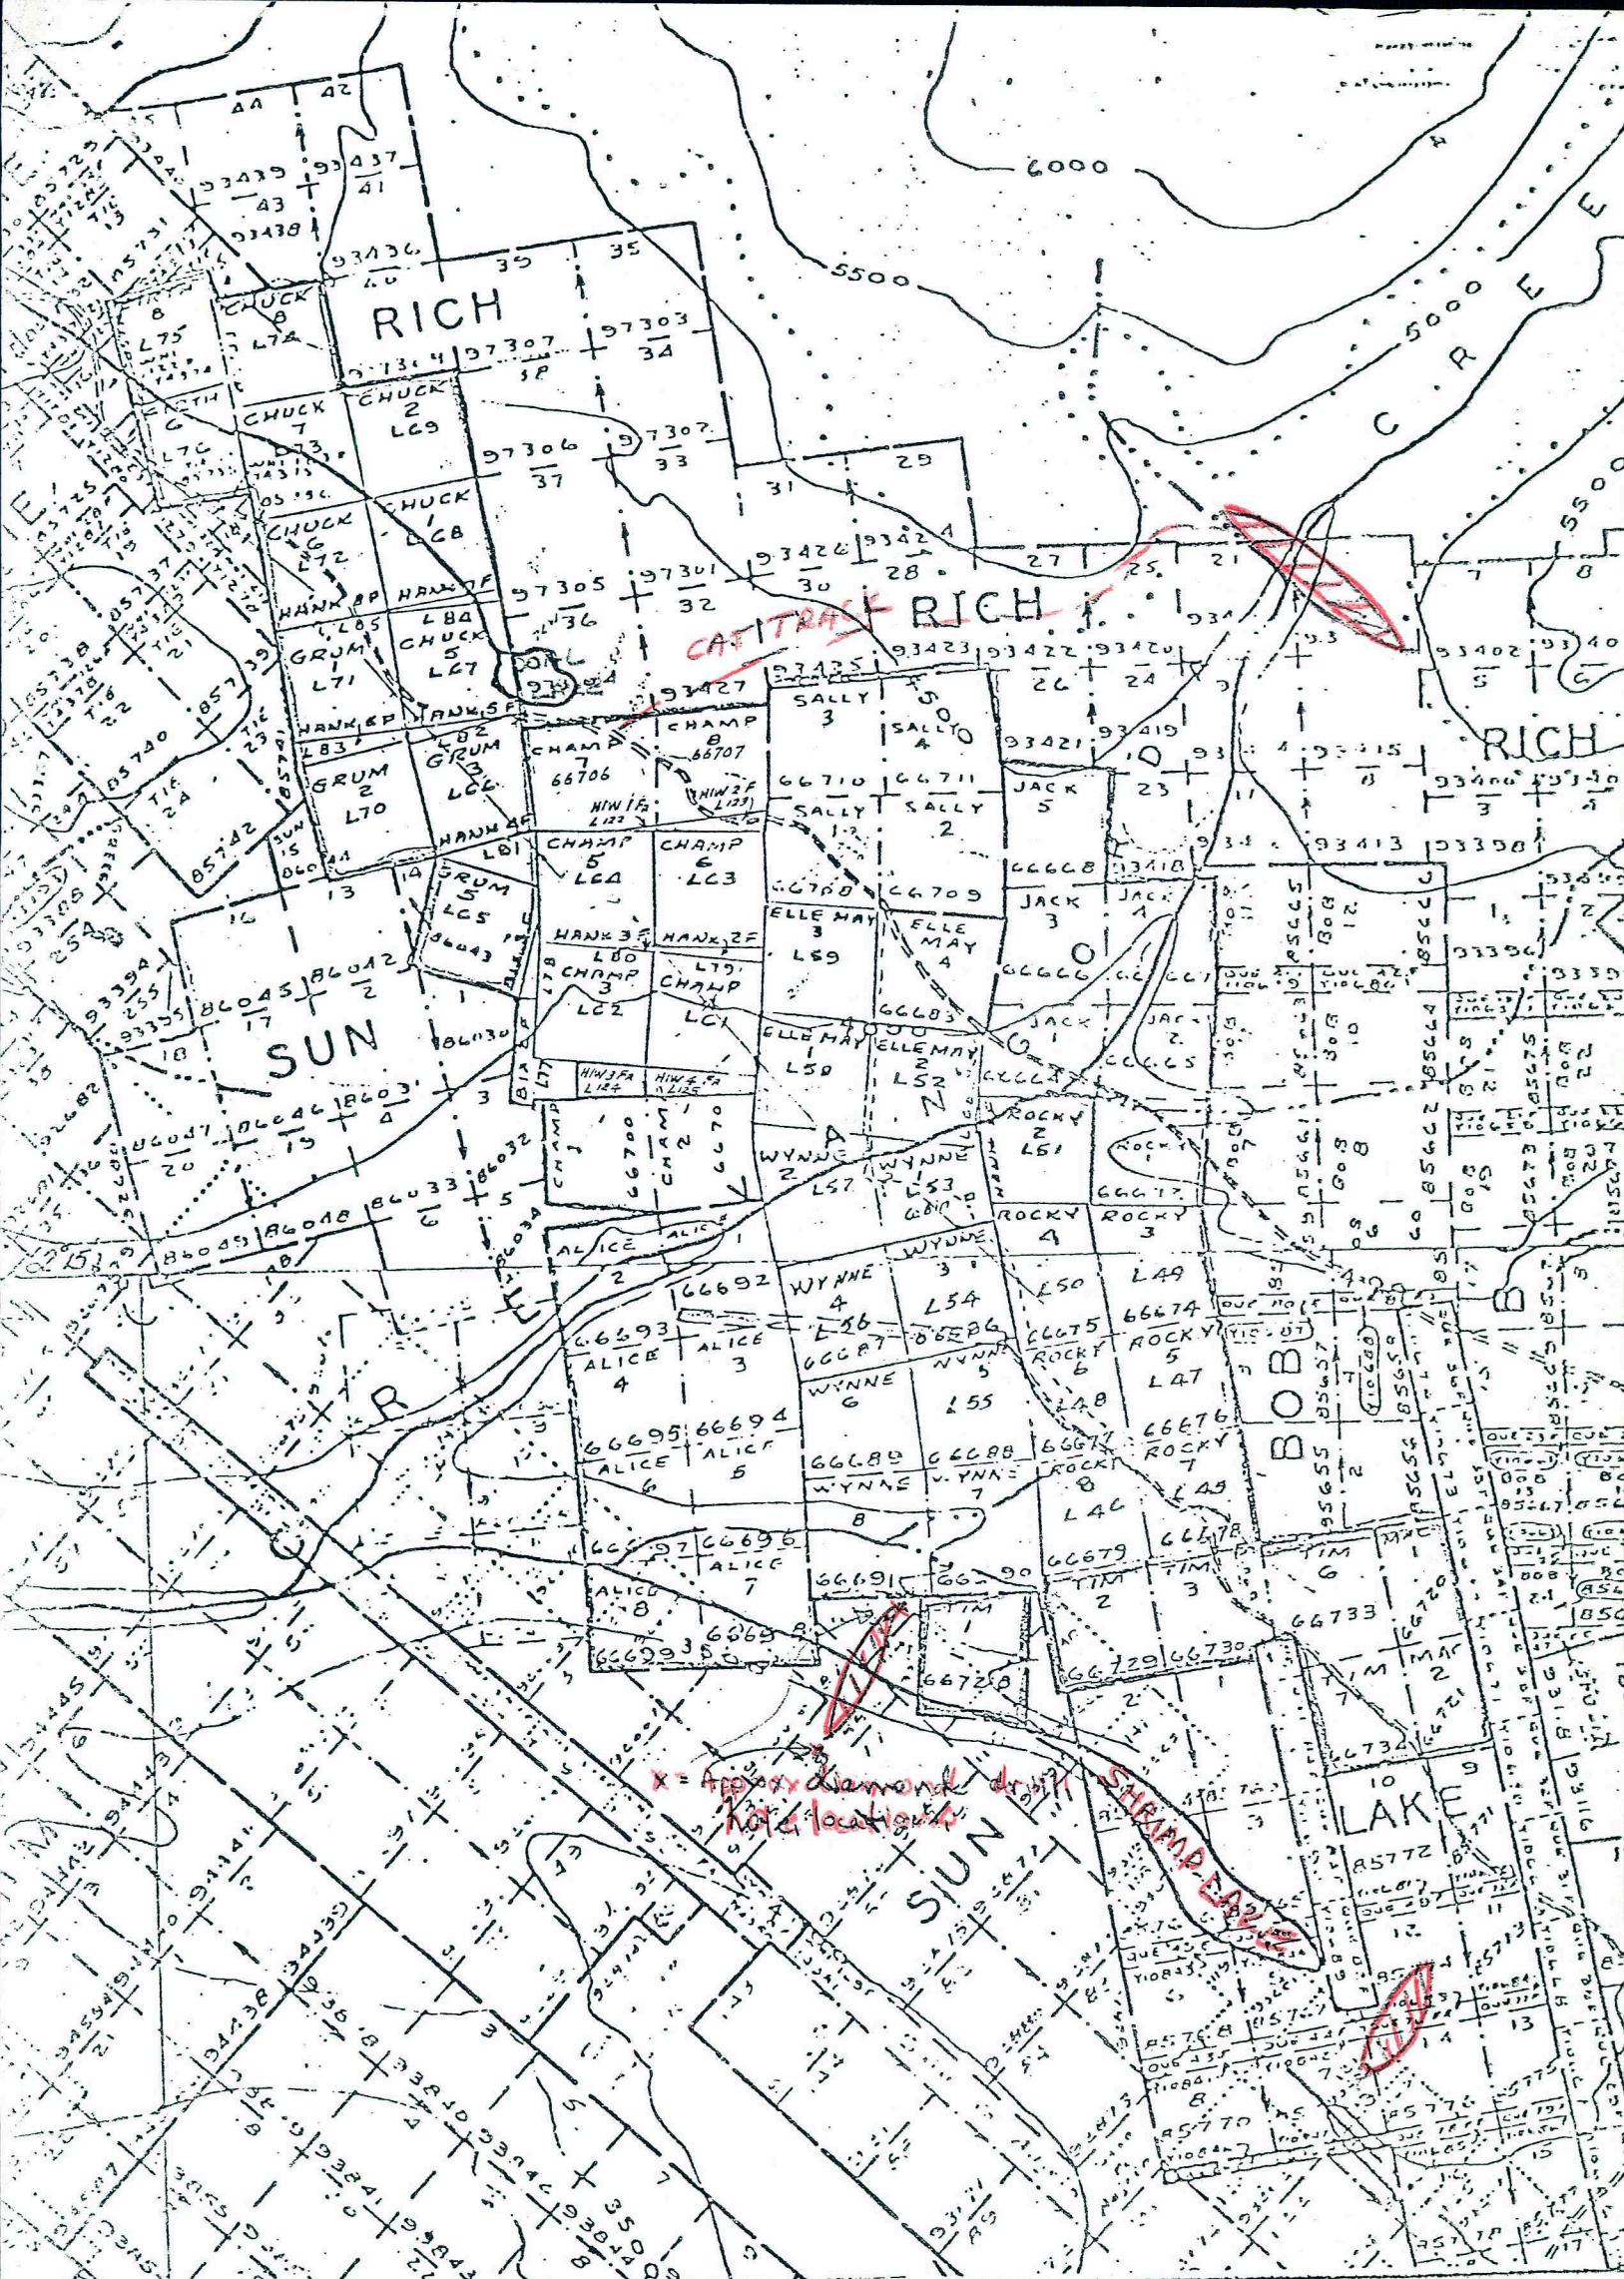

Yours very truly,

KERR ADDISON MINES LIMITED
