Subject..... Re: AEX - Vangorda Area Drilling Date..... June 18, 1974

W. Sirola reported today on recently received assay results from the AEX drilling on the Kerr Addison claims in the Vangorda area of the Yukon Territory.

		<u>%Pb</u>	<u>%Zn</u>	<u>%Cu</u>	<u>oz. Au</u>	<u>oz. Ag</u>
Hole A- 8	306.8 - 322.0 (15.2')		7%			1.0
Hole A- 9	434.0 - 479.0 (45.0')	4.32	7.15	0.08	0.02	2.25
Hole A-10	518.5 - 583.0 (64.5')	4.60	9.65	0.17	0.03	2.52
	or					
	518.5 - 623.0 (104.5')	4.39	6.75	0.13	0.03	1.95
Hole A-11	379.0 - 402.0 (23.0')					Massive Sulphides
	494.0 - 505.0 (11.0')					" "
	584.0 - 599.0 (15.0')					" "
	693.0 - 704.0 (11.0')					" "
	727.5 - 746.0 (18.5')					" " & Min. Phyllite

Assuming a width of mineralization of 800' and a possible strike length of 6000 ft., an estimated programme of 20 holes for 15000 ft. (est. \$300,000) will be required.

Subject..... AEX Drill Results -- Vangorda Area Date..... June 27, 1974

We have been advised by AEX Minerals that Holes A-14 and A-15 have been completed. No assays are available, but excellent mineralization is reported as follows:

A-14	76W 3S	895 - 942 (47')	Good Ore Grade
A-15	92W 10N	425 - 434 (9')	Good Ore Grade
		453 - 481 (28')	High Grade
		483 - 496 (13')	Good Ore Grade
		623 - 631 (9')	Mineralized

This is being put on sections which will be up-to-date by tomorrow.

The A-15 intersection is highly significant regarding northwesterly extension (zone is 3,000' long minimum). The A-14 intersection is probably related to the deep mineralization in A-10. This second deep zone has good potential.

A. Aho reported to W. Sirola today that the following results had been received on Hole A-10 (200' N of A-5):

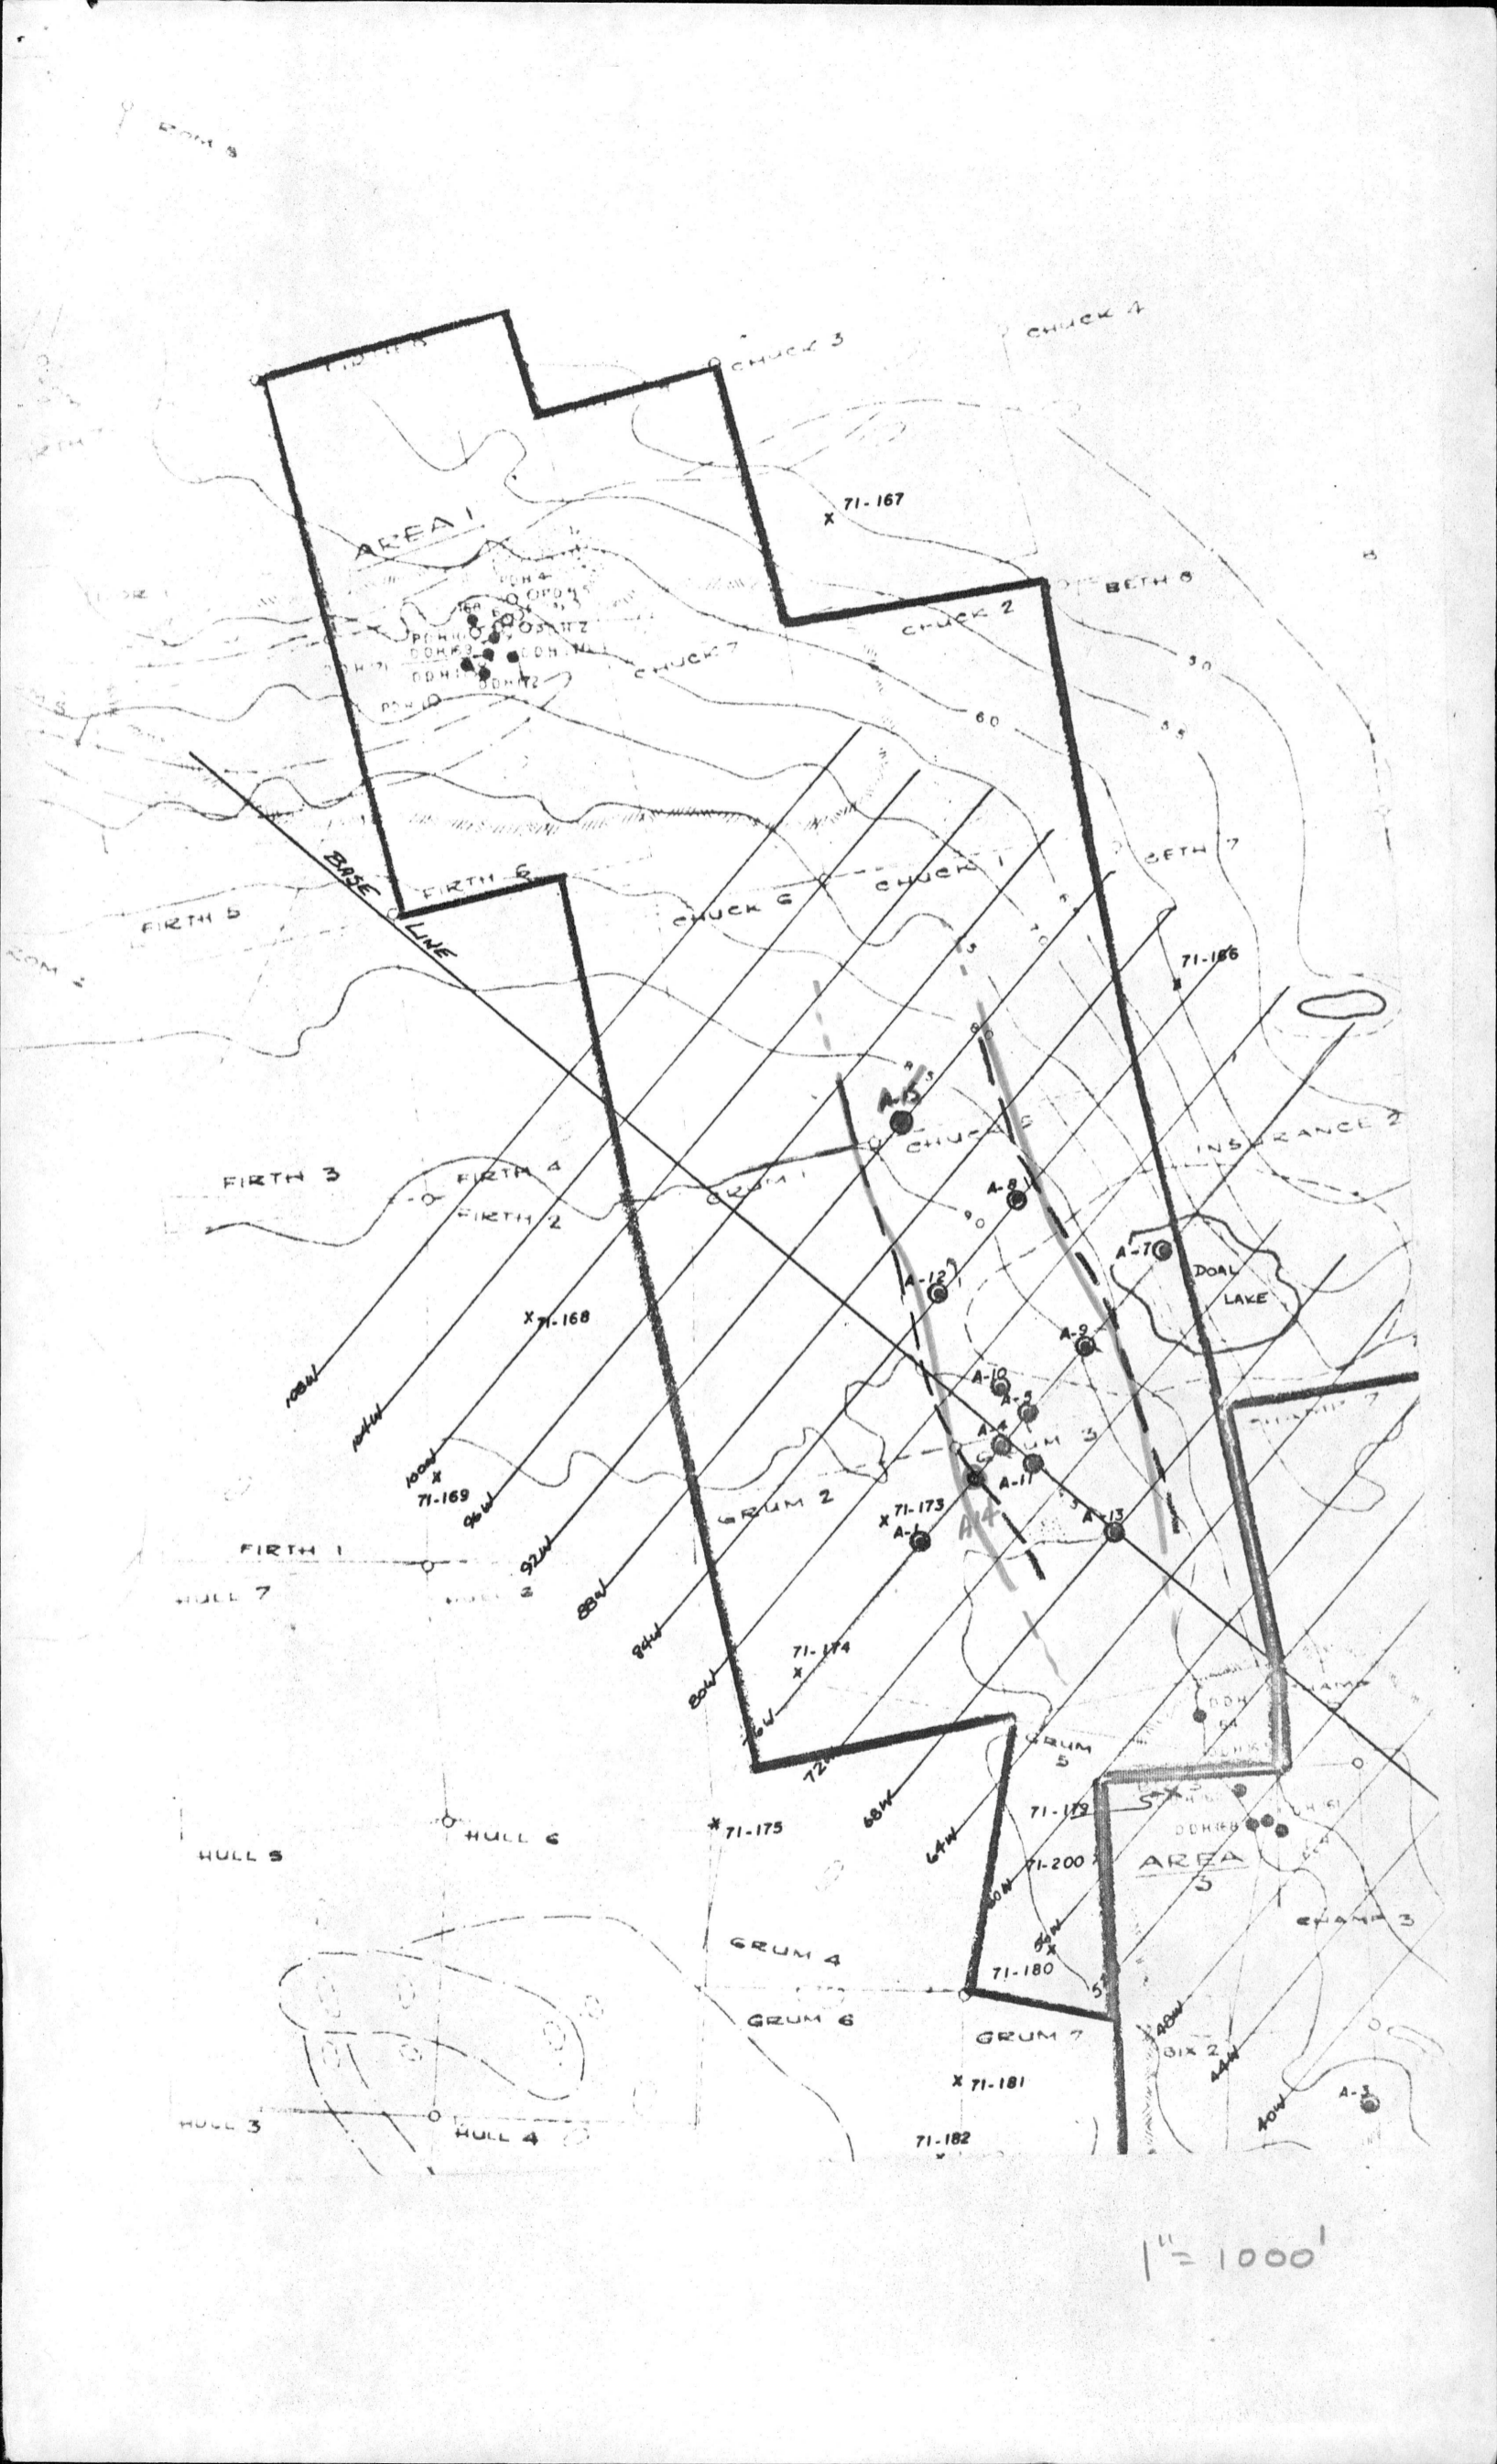

518.5 - 581.0 (62.5')	} EST. 10% Zn, 5% Pb 14.72% Pb, Zn combined, 2.80 oz. Ag.
726.0 - 756.0 (30.0')	
801.5 - 815.0 (13.5')	Estimated as good ore.

Hole A-11 is in progress at a point 200' east of A-4, and is at a depth of 675'. Three intercepts are reported as follows:

379.0 - 402.0 (23.0')	Mineralized.
494.0 - 505.0 (11.0')	Mineralized.
584.0 - 599.0 (15.0')	Mineralized, noted as good ore.
