Subject MLM Test Results on Grum Ores

Date May 25, 1977

*[Handwritten mark]*

14F

Klaus Konigsman called me yesterday to pass on some recent results he had obtained on a composite Grum ore sample. This composite is similar to the breakdown I gave Dick Coleman. His results are based on 8 cycles:

Head: 3.8% Pb 8.8% Zn

	<u>Pb</u>	<u>Zn</u>	<u>Ag</u>	<u>Au</u>	<u>As</u>	<u>Hg</u>	<u>Recovery</u>
Pb Conc.	60 %	7 %	24 oz.	0.14 oz.	0.2 %	90 ppm	75.5%
Zn Conc.	1.3%	57.5%	1.5 oz.	0.005 oz.	0.05%	625 ppm	87.3%
Tails	0.9%	1.0%	0.15 oz.	0.6 oz.	0.31%	10 ppm	-

We have set a meeting date to discuss these results and future work for Tuesday, June 14th, 9:15 am in our Board Room. Lakefield will be present.
