

020524

July 25, W.H.N.G.

33705 20% Y.G. 70% intrusive

706. Few rusty rocks.

80% intrusive

-20% Y.G.

707 Boggy No float at all

708 Ditto

709. Ditto Meadow No stream

Sample from Pothole

710 creek looked to be

mostly intrusive.

710. Rock Sample

711. 80% intrusive (Granodiorite)

20% Y.G.

Bit of fels porph

712 Nails

713. Intrusive (Granodiorite?) to

North 1/2 mile

714. 90% intrusive 10% Y.G. of the  
intrusive most is granite <sup>stone</sup> purple.

719 Bog. No float.

720 Fault - Folded Gr. + float

Back to 716 Intrusive outcrop on  
ridge

Flew N 8 miles then W

up road. Intrusive  
rocks on N slope (4 miles  
after started going W).

721 Mostly Granite. Some  
porph.

722 Float almost all  
fels. porph. No Y.G.  
Breccia Rock ??  
# 722 Rock

Going up 722 creek.  
Gold like finely  
fractured porphyry  
talus on all sides

724, #25 almost all qtz fels  
porph. No Y.G.  
Qtz Euhedral crystals  
are very dark.  
Talus all around

727 all fels<sup>qtz</sup> porph. & Tg Gr  
No Y.G.

Headwaters is finely fractured  
intrusive talus

728 Nests

729. 98% intrusive 2% Y.C. quartzite  
Went up to headwaters of  
729 on ridge. (to E side <sup>draining</sup> <sub>trib</sub>)

Bedrock to side are all  
porphyritic intrusions

- Porph. andesite

- fcls. porph.

- qtz porph.

- Andesite

- Bit of Pyrite found  
in Andesite Bedrock.
