VANCOUVER 1, B.C.

Aug 17- Aug 23, 68. Wolf Canyon Area.

Introduction.

Only 1 major rock unit was encountered in this area & another type.

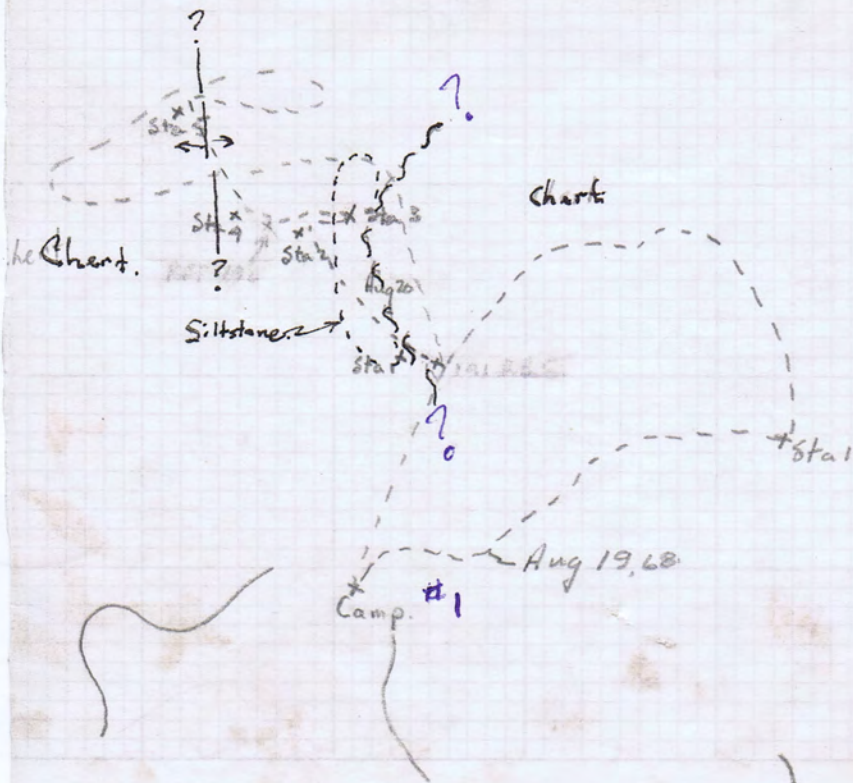

Chert Unit

Chert found in the area was quite prominently banded w: the the bands being $\approx \frac{1}{2}$ " - 1" in thickness. The Cherts trended $\approx 100^{\circ}$ - $160^{\circ}/60^{\circ}$ N.

Siltstone Unit

Also present was a minor siltstone unit. The material was fine grained, brown, & massive. The surface in some areas was stained & traces of pyrite & chalcopyrite were found.
