]The following samples were analyzed for Au and ICP AES by your lab and graded higher than the detection limits for certain elements. Please reanalyze them for the following elements using a method that will provide a quantitative result and please advise me of the method used and it's detection limits.

96HR-2 for Ba
96HR-14a for P
96HR-14b for P
96GM-30 for Ba and Mn
96GM-32 for Ba
96GM-33 for Ba
96GM-34 for Ba
96DH-42d for Ni
96DH-42e for Ni
96DH-42f for Ni
96DH-42g for Ni
96DH-50 for Cd and Zn
96DH-126a for Cu
96DH-126b for Cu

Please reanalyze the following samples for Cu as to establish if there has been any contamination by samples 126a and b

96DH-127
96DH-128a
96DH-128b
96DH-129a
96DH-129b
96DH-130
96DH-131
96DH-132
96DH-133
96DH-134

Please analyze 96DH-43 for Au, Pt, Pd

Thanks
Q Nur
