RE: Drainage Sediment Survey Peel River Area

The proposed stream sediment survey as detailed in your project resume is exempt from screening under the provisions of the Canadian Environmental Assessment Act (CEAA). The proposed work is of the nature of a "physical activity" under the act. These activities fall under CEAA only if they are on the Inclusion List. Accommodation and fuel are being provided by the existing facilities at Eagle Plains, and no long term camp is involved, so the project is excluded from an assessment. Environmental effects of the program will be insignificant.

Hugh
