

Date: April 30, 1996  
To: Economic Development Staff  
From: Bob Holmes  
Subject: Organization of MRD New Division

---

On April 1st, the Department launched a new organizational structure. This change in organization involves creation of a new Mines and Resource Development (MRD) Division. The MRD Division will initially include those staff who were previously working in the old Energy and Mines Branch (including the Canada/Yukon Geoscience Office) as well as the old Oil and Gas Resources Branch. At some time in the future, it is expected that a forestry function will also be added to the MRD Division.

The MRD Division now includes two Branches - the Mineral Resources Branch ( which contains a Geoscience Unit and a Mineral Development Unit) and the Energy Resources Branch (which contains an Energy Unit and an Oil and Gas Unit).

It is planned that a Senior Director for the MRD Division will be recruited in the next few months. During this recruiting period, Bob Holmes will be Acting Sr. Director and Rod Hill will be Acting Director of Mineral Resources. Brian Love's title has been changed to Director Energy Resources Branch, and his responsibilities will include both the Oil and Gas and Energy Units.

We can now go ahead and begin using these new terms in any correspondence we send, in our phone directory and on our business cards. We should also update any signage and include the new names on any brochures etc. put out by the Department.

The attachment shows a current listing of staff, their current titles and contact numbers for the MRD Division.

---

Mines and Resources Development Division

Unit	Last	First	Title	tel #	Fax#	Profs ID	E-Mail
<b>MRD Division</b>							
	Duke	Jesse	Mining Facilitator	3422	667-8601	jduke	jduke@yknet.yk.ca
