Subject: Ross River Negotiations

900463

Hi Dermot. This is to confirm that Grant, Jesse and I will attend the meeting on Monday, 1:30 pm to discuss the Ross River negotiations.

As we discussed yesterday, geologists have assembled a compilation map of the regional geology and minfile data. We request that the agenda for this meeting include some time, about 30 minutes to allow Grant to walk through the information and analysis of the data, and to answer any questions on this information. We have notified our DM that we will be providing this presentation, and expect he may attend in order to assess the information and engage in the discussions around implications of this information in light of land claims negotiations. I will confirm with you whether or not he will be able to attend, as soon as his availability is confirmed.

I also want to let you know that we would be pleased to attend during a presentation by Renewable Resources staff of the results of their ecological and biological appraisals and analysis of existing and new data.

We are also happy to participate in discussions around the Yukon's interest in Final Agreement-negotiated SMAs in the areas covered by the Nahanni--Sekwi Mountain--Niddery Lake--Sheldon Lake--Lansing Range--Tay River map sheets, in which are contained several Final Agreement-SMAs proposed by the Ross River First Nation.

If there are other items which you plan for the agenda, please let me know.

Thanks for your patience in confirmation from us, allowing us to organize departmental participation for this meeting.
