

**NOTES**

Reprocessing of the magnetic data for Yukon was performed between November 2016 and March 2017. Aeromagnetic data (available through NRCan Geoscience Data Repository for Geophysical Data) were compiled, data of different resolutions were merged, and a series of images individually levelled for each map sheet were produced. For each 1:250 000-scale map, the following magnetic derivative maps were produced:

- 1.Residual Total Magnetic Field;
- 2.Reduced-to-Pole Magnetic Field (RTP);
- 3.First Vertical Derivative of the Reduced-to-Pole Magnetic Field (RTP\_VD); and
- 4.Tilt Derivative of the Reduced-to-Pole Magnetic Field (RTP\_TDR).

These maps are provided both as GeoTiff and Geosoft grid files. Colour ramps/legends are provided for each map.

The Yukon Geological Survey created georeferenced \*.pdf maps of the shaded relief colour contour products for each 1:250 000 map sheet.
