Marshall Lake is natural thaw. Area within the dredge limit is approximately 13,900 sq. yds. Thawing water from the top row of units will be returned to the pumps through a hand-cut drain 3 ft. wide, 2 ft. deep and about 800 ft. long which will top the lake in Unit 32 and discharge to the 1936 stripped area in Unit 30. From here the water will flow to Unit 25 then through the existing 1936 stripping drain to Dominion Creek. Units 30 to 35 will be stripped by thawing or stripping water as conditions indicate.

Probable driving rate per 10 hr. shift 120 ft.
 Probable driving season May 15 to Aug. 1 80 days.
 Driving crew required 24.
 Order in which units will be driven 29, 28, 30, 27, 31, 32, 33, 26, 35, 25, 34.
