

THE YUKON CONSOLIDATED GOLD CORPORATION, LIMITED

DAWSON, Y. T.
CANADA

MEMORANDUM

January 20th, 1958.

To: Mr. C. Gloslie, Acting Resident Manager.

From: P. M. Kavanagh, Development Engineer.

Exploratory Work Done on the Right Limit of Hunker Creek in 1957.

Attached to this memorandum is a sketch plan, based on the north-west quadrant of Belcher and Associates' Mosaic #4, showing the location (in red) of exploratory work* done on the right limit of Hunker Creek in 1957. Data concerning the work carried out has been obtained from the Engineering Office at Bear Creek.

The purpose of the work was to test the possibility of placer gold occurring within one or both of the areas marked with "X". Holes No. 1 and 2 were drilled first and yielded discouraging results. Dawson management then decided to traverse into the right limit of the creek, on a line normal to the "narrows", and to look for a seasonable drilling site. On a traverse which extended a 4,000 foot horizontal distance, mainly bedrock was found and little or no gravel.

The attached sketch plan shows 1) that Holes No. 1 and 2 were drilled at the extreme south east end of the ground to be tested, and

2) that the 4,000 foot traverse normal to the "narrows" did not penetrate the ground to be tested.

The conclusion is that the work which was carried out did not fulfill its purpose.

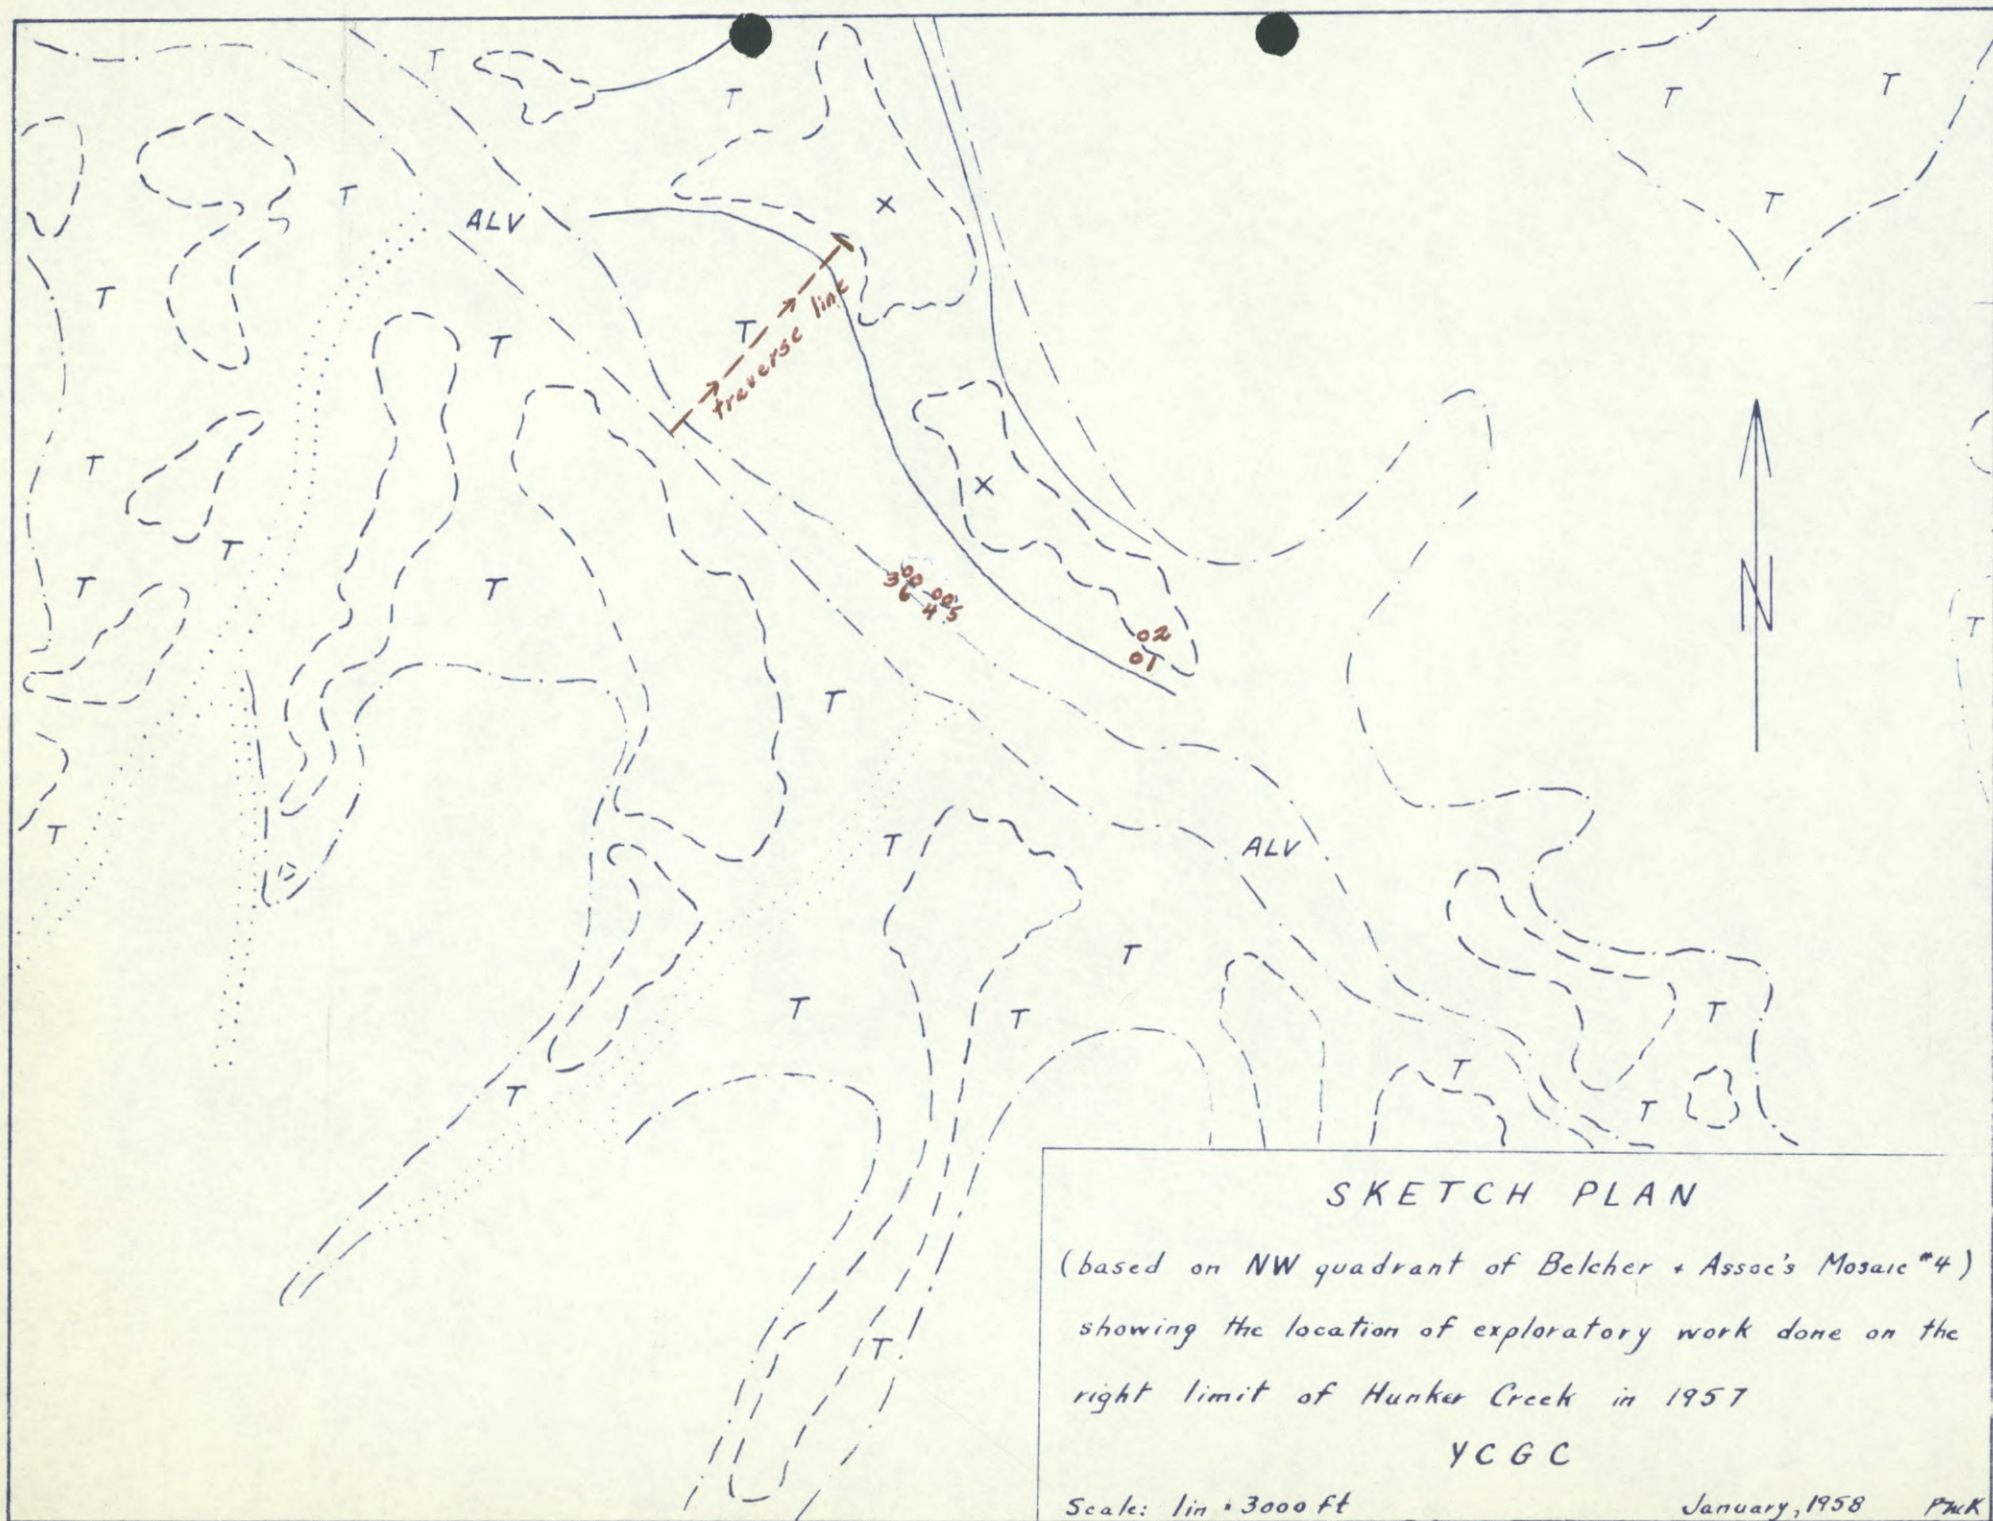

It is recommended that in the summer of 1958 detailed prospecting (pitting) be carried out in each of the two areas and, if that work is encouraging in any way, that one hole be drilled in the centre of each of them.

* Holes No. 3, 4, 5, 6 were drilled to test a Pb-Ag possibility.
